PROFESSIONAL SUMMARY

Results-driven Senior iOS Engineer with 5+ years of experience building and maintaining high-performance fintech applications. Proven expertise in Swift, iOS SDK, UIKit, and modern mobile architectures (MVVM, Clean Architecture, VIPER). Successfully delivered secure banking features, payment systems, and financial tools serving thousands of users. Strong track record of leading mobile development projects, mentoring junior developers, and collaborating with cross-functional teams. Passionate about clean code, scalable architecture, and delivering exceptional user experiences in production environments.

PROFESSIONAL EXPERIENCE

Senior iOS Engineer

Oct 2024 - Present

Birbank

Baku, Azerbaijan (On-site)

- Develop and maintain critical features for Birbank's flagship iOS application serving 3 million+ active users - one of the top banking apps in Azerbaijan
- Implement secure payment flows, transfers, and banking operations using Swift and iOS best practices
- Collaborate with product managers, designers, and backend engineers to deliver high-quality features
- Optimize app performance, reduce crash rates, and improve user experience through data-driven insights
- Participate in code reviews, architectural decisions, and sprint planning in Agile/Scrum environment

Leading iOS Engineer

Feb 2023 - Present

Rico Mobile

Baku, Azerbaijan (Remote)

- Lead end-to-end iOS development for Beso, a business management app with inventory, invoicing, and accounting features
- Own technical architecture, technology stack decisions, and infrastructure for the entire mobile platform
- Built e-invoicing integration, expense tracking, and real-time reporting features from scratch
- Implement scalable solutions using Swift, Combine, async/await, and modern iOS frameworks
- Conduct performance optimization, memory management, and debugging to ensure smooth user experience
- Drive technical roadmap and long-term product strategy in collaboration with stakeholders

● Senior iOS Engineer

ABB Innovation

Oct 2023 - Apr 2025

Baku, Azerbaijan (Remote)

- Developed iOS features for ABB Bank as external development partner working across multiple feature teams
- Successfully integrated Masterpass by Mastercard for secure in-app payment processing
- Contributed to large-scale fintech features including P2P transfers, investments, and digital wallet functionality
- Collaborated with in-house teams on architectural refactoring, code quality improvements, and CI/CD optimization
- Participated in sprint planning, daily standups, and release cycles in multi-team Agile setup

● Senior iOS Engineer

Unibank

Jul 2023 - Oct 2024

Baku, Azerbaijan (Hybrid)

- Developed and maintained UBank iOS application serving thousands of banking customers
- Implemented new banking features including account management, card operations, and loan services
- Improved app architecture using Clean Architecture principles and dependency injection
- Worked closely with UX designers to ensure pixel-perfect UI implementation and smooth animations
- Ensured app stability and quality through unit testing, UI testing, and comprehensive QA cycles

● Leading iOS Developer

ABB (Azerbaijan Business Bank)

Sep 2022 - Jul 2023

Baku, Azerbaijan (On-site)

- Led iOS development team for ABB Mobile app serving 1 million+ active users - one of the top banking apps in Azerbaijan
- Conducted code reviews, established coding standards, and mentored junior developers
- Collaborated with stakeholders to define technical requirements and delivery timelines
- Implemented SWIFT transfers, bill splitting, investment balance management, and Contact money transfer integration
- Optimized app performance, reducing load times by 30% and improving crash-free rate to 99.5%
- Worked in Nexus framework coordinating across multiple Scrum teams

● iOS Developer

ABB (Azerbaijan Business Bank)

Sep 2020 - Sep 2022

Baku, Azerbaijan (On-site)

- Developed and maintained production iOS banking application using Swift and UIKit
- Implemented user-facing features for payments, transfers, card management, and account operations
- Collaborated with backend developers to integrate RESTful APIs and handle network layer
- Wrote clean, maintainable code following OOP principles and SOLID design patterns
- Used Git for version control, Jira for task management, and participated in Agile ceremonies

● Instructor - Mobile Development

ABB Innovation

Mar 2023 - Jun 2023

Baku, Azerbaijan (Contract)

- Taught mobile development fundamentals using MIT App Inventor to beginner students
- Created comprehensive lesson plans and hands-on projects for aspiring developers
- Mentored students in app design, problem-solving, and creative thinking
